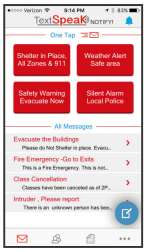
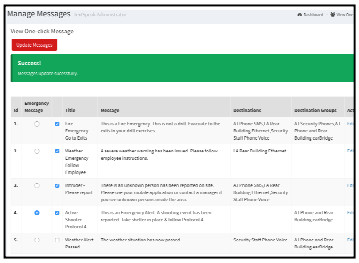
DE-82U Digital Event Interface

8 Input 2 Output Expandable Sensor and Control Module

- **Sensor contacts trigger instant audio announcements and transmit status online**
- **Isolated outputs may be remotely controlled from off-premise network messaging**
- **Supports all TextSpeak Cloud Dashboard and Notify! mobile Apps.**
- **Interfaces directly to all earBridge Amplifiers using plug & play auto-detection**
- **Expandable system supports up to 99 sensor points and 16 outputs**





- Interfaces directly to earBridge Cellular, Wifi or Ethernet Amplifiers USB 2.0 connections
- Immediately plays locally stored audio alerts and transmits event status to the cloud for distribution to Notify! and voice, SMS email and notification alerts.
- Supports repeat announcements & multilingual voices
- Isolated output closures can be managed by TextSpeak cloud applications and Notify! Mobile Apps
- Test pushbuttons & indicators provide easy diagnostics. Supervised tests auto-report failures to the cloud.
- Simple expansion via USB hubs allows for up to 9 DS-82U to create 99 sensor points with 16 outputs.
